

T POINT I WHITEPAPER

Executive Summary

TPOINTI is an innovative platform in the crypto world that combines artificial intelligence, gamification, and social structures to create a unique, fast, and interactive experience for users. Our goal is to simplify entry, foster genuine engagement, and build a motivated and active community — where users are not merely spectators but key players in the game.

In the first phase, everything starts with a simple Telegram bot, but beneath this simplicity, the engine of a large, intelligent ecosystem powers on.

In the second phase, network energy rises; XP, daily missions, competitions, and a space full of interaction and challenges begin. Everything is designed so that by simply being part of the ecosystem, users feel growth, play, and winning.

With the platform's expansion, features activate that add layers of chance, entertainment, and surprising rewards to the user experience — quietly but powerfully. As the community matures, the real game begins.

Problem

Current platforms are complex and unintuitive for newcomers. There is no smart and simple analytical tool for decision-making. Existing systems lack real incentives for user engagement and loyalty.

T POINT I Solution

TPOINTI is designed with a phased and interaction-driven structure:

Easy entry via a Telegram bot, AI support, and a multi-layer reward system that encourages active participation. Unlike traditional platforms, we combine daily missions, XP, and gamification with a natural network growth mechanism — progressing on the platform equals real growth and tangible rewards.

Product Architecture

Phase 1: Telegram bot with a dashboard and simple tasks, official website

Phase 2: Mini-games, XP system, and user profiles

Later Phases: Mobile app, NFTs, and API

Reward Mechanism

Five-level referral system:

Level 1: 500 TPT per new member + 1 game ticket for every 3 members

Level 2: 300 TPT

Level 3: 200 TPT

Level 4: 100 TPT

Level 5: 50 TPT

Also includes interactive daily tasks, discounted pre-sale rewards, and loyalty points.

Referral Level 1 Reward Mechanism in the Presale
During the token presale stages, users can earn a 5% TPT reward from every purchase made by their direct Level 1 referrals.

Tokenomics

Symbol: TPOINTI

Total Supply: 100 billion

Rewards & Referrals
35 %

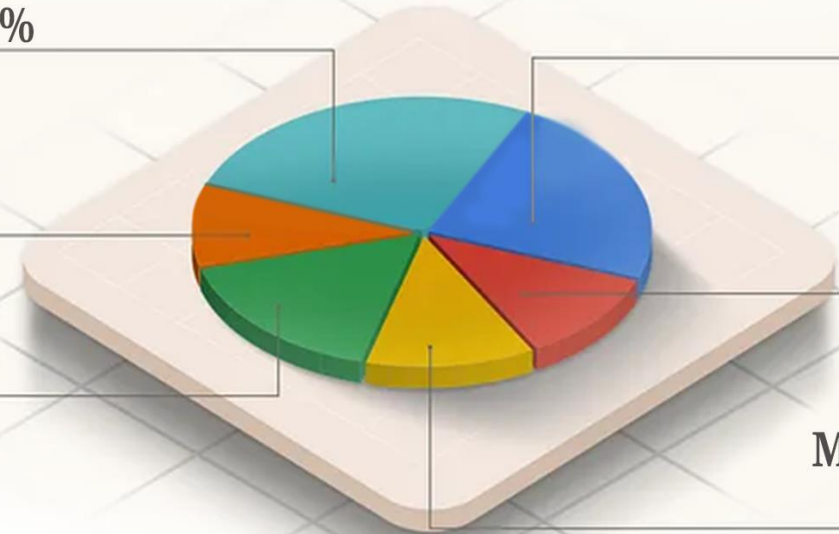

Pre-sale
10 %

Airdrop
15 %

Liquidity
20 %

Team
10 %

Marketing
10 %

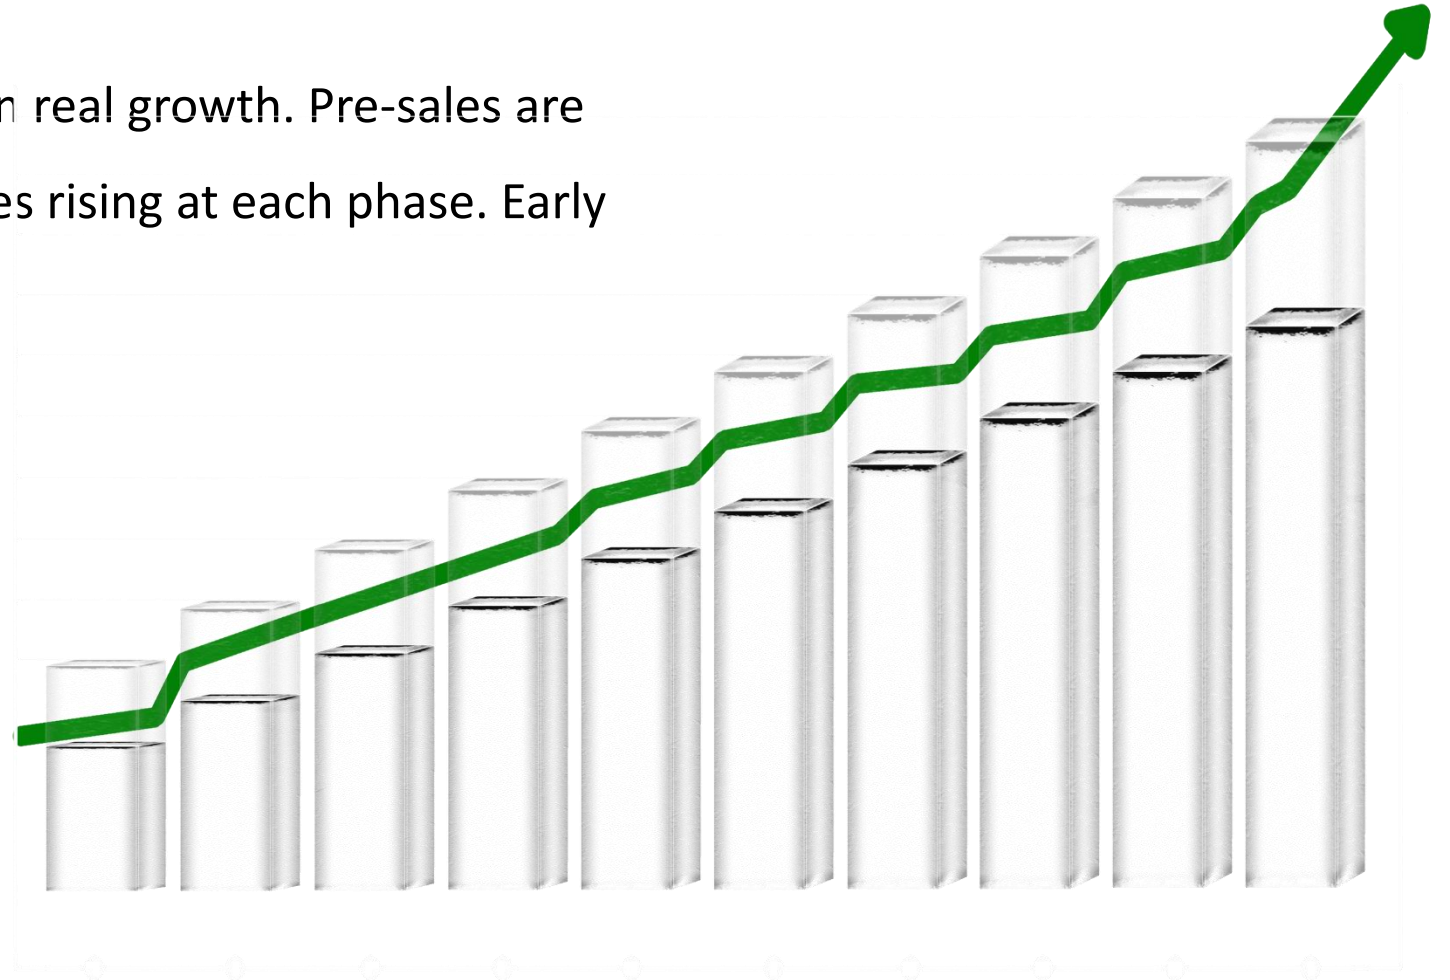

Significant allocation to rewards and referrals aims to drive organic growth and incentivize early users.

Phased Growth Model

Each phase activates based on real growth. Pre-sales are multi-staged, with token prices rising at each phase. Early users gain a better position.

Roadmap

Phase 1 | Official Launch — October 2025

Launch Telegram bot and user panel

Release official website with live stats

Public airdrop to attract the first wave of users

Begin phase 1 pre-sale

Phase 2 | Engagement Wave — November 2025

Conduct phases 2 and 3 of pre-sale

Activate mini-games and XP system

Token price increases with each phase — early buyers pay less

Unveil special rewards for pre-sale participants

Marketing campaigns and rapid social network growth

Phase 3 | Market Warm-up — February 2026

Develop liquidity pool and finalize trading tools

Integrate AI analytics into user environment

Launch early version of mobile app with advanced features

Surprise experiences within the app combining luck and

excitement

Official listing banners released

Community prepared for launch

Phase 4 | Listing & Trading Start — March 2026

Token listed on first exchange (DEX or CEX)

Public trading begins with promotional wave

Holder rewards, brand growth, and global phase kick-off

Security and Transparency

Smart contracts audited by reputable firms. Team tokens locked for 12 months. Transparent dashboard for tracking distribution and progress. Gradual introduction of team members with verified official accounts.

Project Team

TPOINTI is managed by an 18-member expert team with proven experience in blockchain projects, market analysis, game design, and AI development. The team includes developers, designers, tokenomics advisors, and executive managers who know the path and have the capability to implement it.

TPOINTI is not just an idea — it is backed by a capable team.

Final Vision

TPOINTI is more than just a trading tool; it is a platform for real, simple, and smart entry into the crypto world. We create a space that transforms users from spectators into active participants and winners.

But the journey doesn't end here.

As features expand, TPOINTI will enter domains that elevate excitement, chance, and intelligence — from apps with entertainment structures and instant rewards to experiences close to digital lotteries.

Everything is designed with a clear purpose: turning daily user interaction into opportunities to win, grow, and belong.
